

## Motion to Craigentenny & Duddingston Neighbourhood Partnership

The partnership notes

The apparent increase in graffiti in public areas and on both public and private buildings within the partnership area.

The concern amongst residents that unless a “zero tolerance” approach is taken to graffiti it spreads quickly and is often the catalyst of other anti social behaviour

The work already done by police and neighbourhood teams to combat this problem

The partnership calls for

A presentation at its March meeting to include the recorded levels of graffiti in the partnership area over the last two years, on the work that is done to combat graffiti including prosecution of culprits and on other possible measure to reduce this graffiti

In particular this presentation should identify barriers to quick removal of graffiti including resource levels and issues around graffiti on privately owned buildings
