

**Planning Permission 11/02468/FUL
at
Proposed Telecommunications Cabinet 2 Metres
North West Of
52 Drummond Street
Edinburgh**

**Development Management Sub-Committee
of the Planning Committee**

1 Purpose of report

To consider application 11/02468/FUL, submitted by Openreach. The application is for: **1 x DSLAM telecommunications broadband cabinet (1408mm x 750mm x 407mm).**

It is recommended that this application be **GRANTED** subject to the conditions below.

2 The Site and the Proposal

Site description

The application site is an area of public footpath on Drummond Street. It is to rear of the footpath and is set against a stone wall of approximately one metre in height. An existing telecommunications box, PCP042, is located approximately 10 metres north-west of the site across Drummond Street, and an existing cable TV cabinet is located approximately six metres south-east of the proposal. The depth of the footpath at this location is approximately 1.7m. A section of the Flodden Wall, which is a scheduled ancient monument, runs along Drummond Street opposite to the proposal site.

This property is located within the Southside Conservation Area.

Site History

None.

Pre-Application Process

Pre-application discussions were undertaken concerning the application process for this and similar cabinets throughout the city.

Description Of The Proposal

It is proposed to install a freestanding green coloured telecommunications cabinet 750mm wide by 407mm deep by 1408mm high. The cabinet is required as part of an upgrade that will be used to provide high speed broadband services to residents and businesses in the area. The cabinet requires to be connected to existing telecommunications apparatus including an underground junction box.

The applicant has provided a supporting statement which is available to view on the Planning and Building Standards Portal.

3. Officer's Assessment and Recommendation

Determining Issues

Do the proposals harm the character or appearance of the conservation area? If they do, there is a strong presumption against granting of permission.

Do the proposals comply with the development plan?

If the proposals do comply with the development plan, are there any compelling reasons for not approving them?

If the proposals do not comply with the development plan, are there any compelling reasons for approving them?

ASSESSMENT

To address these determining issues, the Committee needs to consider whether:

a) the proposal will adversely affect the character or appearance of the conservation area;

b) the proposal have a detrimental impact on the character or setting of the scheduled ancient monument; and

c) the proposal has implications for road/public safety.

a) The South Side Conservation Area Character Appraisal emphasises the harmonious scale, massing and materials and the significance of key institutional buildings within the area.

The proposed telecommunications cabinet is to be located at the heel of the pavement against a stone wall approximately one metre in height. Also located at this pedestrian junction of Drummond Street and Pleasance is an existing PCP cabinet and a cable TV cabinet. In the context of its surroundings the proposed cabinet will have a minimal visual impact, will not constitute an incongruous feature, and will therefore not adversely affect the character or appearance of the conservation area.

b) The proposed telecommunications cabinet will be located on the opposite side of the road from the scheduled ancient monument, adjacent to the modern residential developments. As the proposal will be viewed against the backdrop of the modern development there will be no detrimental impact on the character or setting of the scheduled monument.

c) Transport Planning has been consulted and has no objections to the proposal. There are no implications for pedestrian or road safety.

In conclusion, the proposal complies with the development plan and relevant non-statutory guidelines. The proposal preserves the character and appearance of the conservation area, and would not prejudice road/public safety. There are no material considerations which outweigh this conclusion.

As the proposal does not involve the erection of a telecommunications mast or antenna, an ICNIRP declaration is not required.

As the Council is the land owner, it has an interest in the application and a Committee decision is required.

It is recommended that the Committee approve this application subject to removal of the equipment when obsolete.

REASON FOR DECISION

The proposal complies with the development plan and relevant non-statutory guidelines and there is no significant impact on character or road and pedestrian safety.

Consultations, Representations and Planning Policy

Consultations

Transport Planning

No Objections.

Representations

None.

Full copies of the representations made in respect of this application are available in Group Rooms or can be requested for viewing at the Main Reception, City Chambers, High Street.

Planning Policy

The proposal site is located within an urban area, the Southside Conservation Area and the World Heritage Site, as designated by the Edinburgh City Local Plan.

Relevant Policies:

Relevant policies of the Edinburgh City Local Plan.

Policy Env 6 (Conservation Areas Development) sets out criteria for assessing development in conservation areas.

Policy Inf 5 (Telecommunications) sets criteria for assessing telecommunication developments.

Relevant Non-Statutory Guidelines

Non-statutory guidelines on "RADIO TELECOMMUNICATIONS" set out detailed guidance for the siting and design of masts, antennas, cabins and equipment in all locations, with special reference to listed buildings and other sensitive situations.

The South Side Conservation Area Character Appraisal emphasises the harmonious scale, massing and materials and the significance of key institutional buildings within the area.

Policy Env 8 (Protection of Important Remains) establishes a presumption against development that would adversely affect the site or setting of a Scheduled Ancient Monument or archaeological remains of national importance.

Conditions/Reasons associated with the Recommendation

Recommendation

It is recommended that this application be **GRANTED** subject to the conditions below.

Conditions

1. In the event that equipment becomes obsolete or redundant it must be removed and the site reinstated to the satisfaction of the Planning Authority within 3 months from that date.

Reasons

1. To minimise the level of visual intrusion, and ensure the reinstatement of the site to a satisfactory standard.

INFORMATIVES

It should be noted that:

1. The development hereby permitted shall be commenced no later than the expiration of three years from the date of this consent.

2. As soon as practicable upon the completion of the development of the site, as authorised in the associated grant of permission, a 'Notice of Completion of Development' must be given, in writing to the Council.

3. No development shall take place on the site until a 'Notice of Initiation of Development' has been submitted to the Council stating the intended date on which the development is to commence. Failure to do so constitutes a breach of planning control, under Section 123(1) of the Town and Country Planning (Scotland) Act 1997.

End
