

**Oxgangs Central Residents
Association**

16th August 2012

To whom it may concern

Oxgangs Central Residents Association supports Councillor Rust proposals for the City of Edinburgh Council to seek a definite timescale for the upgrade of the power supply to various council homes in the Oxgangs area from Scottish Power. Tenants have benefited from the refurbishment of kitchens and bathrooms in the area however; tenants have not been able use the newly installed showers or been given any firm details of when they can. This lack of information has been a major inconvenience to tenants as some have had to change work shifts to accommodate confirmed works, only to have the works cancelled at the last minute.

Furthermore, we welcome the proposal to explore the development of an arrangement with the public utilities companies in regard to improvement work on City of Edinburgh Council estates. We think a more joined up approach would help with project management and in the long term provide better value for money as well as reduce the disturbance for tenants during major improvement works.

Sincerely

Fred Fielding
Chairman
Oxgangs Central Residents Association.
