## REPORT ON A FORTHCOMING PLANNING APPLICATION FOR THE DEVELOPMENT OF AN INTEGRATED HEALTH AND SOCIAL CARE FACILITY COMPRISING LONG AND SHORT STAY RESIDENTIAL ACCOMMODATION (CLASS 8 & 10), OPEN SPACE, LANDSCAPING AND NEW ACCESS AND ASSOCIATED WORKS INCLUDING DEMOLITION.

Item number	9.2
Report number	
Wards	

### Summary

---

The purpose of this report is to inform the Development Management Sub-Committee of a forthcoming planning application for an integrated health and social care facility at the Royal Victoria Hospital site in Craighleith.

In accordance with the provisions of the Town & Country Planning (Scotland) Act 1997 as amended, the applicants submitted a Proposal of Application Notice on 13 August 2014.

## **REPORT ON FORTHCOMING PLANNING APPLICATION FOR THE DEVELOPMENT OF AN INTEGRATED HEALTH AND SOCIAL CARE FACILITY COMPRISING LONG AND SHORT STAY RESIDENTIAL ACCOMMODATION (CLASS 8 & 10), OPEN SPACE, LANDSCAPING AND NEW ACCESS AND ASSOCIATED WORKS INCLUDING DEMOLITION.**

### **Recommendations**

---

**1.1 It is recommended that the Committee note the key issues at this stage and advise of any other issues.**

### **Background**

---

#### **2.1 Site Description**

The Royal Victoria Hospital site extends to 6.1 hectares in area. This Proposal of Application Notice refers to the north west corner of the hospital site and is 1.7 hectares in area.

This site is bounded by residential areas to the north and west and by the remainder of the hospital site to the east and south.

There is a former stable block at the north west corner of the site, which is currently used for storage. Although it is of traditional character and appearance, it is not listed. Also within this application site are various existing hospital buildings which are either still in hospital use or are vacant. These buildings range from single storey to two storeys in height. The single storey buildings vary in style and quality from pre-fabricated buildings in poor condition to the architecturally designed (Reiach and Hall) 1960s accommodation with courtyard spaces. The two storey buildings (Stewart House) were formerly nurses' accommodation and date back to the 1930s.

There are established mature trees along the western boundary of the site, which provide a degree of separation between the application site and the adjoining residential area.

There is vehicular and pedestrian access from Craigleith Road which serves this part of the site via a circular one-way system internal to the site.

## 2.2 Site History

There is no relevant site history, although a concurrent Proposal of Application Notice has been submitted for a masterplan which covers this site and the rest of the Royal Victoria Hospital site (Proposal of Application reference: 14/03299/PAN).

## Main report

---

### 3.1 Description of the Proposal

Planning permission will be sought for the development of an integrated health and social care facility, comprising long and short stay residential accommodation, open space, landscaping and new access, together with various works including demolition of existing buildings.

### 3.2 Key Issues

The key considerations against which the eventual applications will be assessed include whether:

**a) the development would be acceptable in principle having regard to the development plan;**

The Edinburgh City Local Plan identifies the site as being within the urban area where there is a presumption in favour of appropriate development where it conforms to other policies in the plan.

There is a small section of the site which falls within the open space designation and in these areas there is a presumption against development unless it can be demonstrated that certain criteria will be met.

The Proposed Local Development Plan maintains the site as being located within the urban area with a small area of designated open space.

**b) the design and layout are acceptable within the character of the area; and does the proposal comply with the Edinburgh Design Guidance.**

The application will be required to comply with the Edinburgh Design Guidance. A design and access statement will accompany the application.

**c) access arrangements are acceptable in terms of road safety and public transport accessibility;**

The proposals should have regard to transport policies of the Edinburgh City Local Plan and Designing Streets. Consideration will need to be given to the impact on traffic flows on local roads and access to public transport. A transport statement will be required to support the application.

**d) there are any other environmental factors that require consideration;**

The applicants will be required to submit sufficient information to demonstrate that the development is appropriate at this location and that the site is capable of accommodating the development while maintaining residential amenity. In order to support the application the following supporting documents will be submitted:

- Pre-Application Consultation Report
- Planning Statement
- Design and Access Statement
- Transport Statement
- Landscape and Visual Impact Appraisal
- Flood Risk Assessment and Surface Water Management Plan
- Noise Assessment
- Phase 1 Habitat and Protected Species Survey
- Heritage/ Archaeological Assessment

### **3.3 Conclusion**

This report highlights the main issues that are likely to arise in relation to the various key considerations. This list is not exhaustive and further matters may arise when the new applications are received and consultees and the public have the opportunity to comment.

## **Financial impact**

---

4.1 There are no financial implications for the Council.

## **Risk, policy, compliance and governance impact**

---

5.1 Provided planning applications are determined in accordance with statutory legislation, the risk is low.

## **Equalities impact**

---

6.1 This is a pre-application report. When a planning application is submitted it will be assessed in terms of equalities and human rights.

## **Sustainability impact**

---

7.1 A sustainability statement will be submitted with the application.

## Consultation and engagement

---

8.1 The Proposal of Application Notice (reference 14/03300/PAN) outlined a public exhibition to be held on 4 September 2014 at The Hazel Hall, St Ninian's Church. The results of the community consultation will be submitted with the application as part of the Report on Community Consultation.
