

## 2 Design Principles for New Development

### Item 6.1

150 The Council encourages innovation and well designed developments that relate sensitively to the existing quality and character of the local and wider environment, generate distinctiveness and a sense of place, and help build stronger communities. Policies Des 1–Des 13 will be used to assess planning applications to meet the following objectives. More detailed advice on how to interpret and apply these policies can be found in Council guidance including in the Edinburgh Design Guidance document.

#### Objectives

- a) To ensure that new development is of the highest design quality and respects, safeguards and enhances the special character of the city
- b) To ensure that the city develops in an integrated and sustainable manner
- c) To create new and distinctive places which support and enhance the special character of the city and meet the needs of residents and other users

#### Policy Des 1 Design Quality and Context

Planning permission will be granted for development where it is demonstrated that the proposal will create or contribute towards a sense of place. Design should be based on an overall design concept that draws upon positive characteristics of the surrounding area. Planning permission will not be granted for poor quality or inappropriate design or for proposals that would be damaging to the character or appearance of the area around it, particularly where this has a special importance.

151 This policy applies to all new development, including alterations and extensions. The Council expects new development to be of a high standard of design. The Council's policies and guidelines are not to be used as a template for minimum standards. The purpose of the policy is to encourage innovation in the design and layout of new buildings, streets and spaces, provided that the existing quality and character of the immediate and wider environment are respected and enhanced and local distinctiveness is generated.

### Policy Des 2 Co-ordinated Development

Planning permission will be granted for development which will not compromise:

- a) the effective development of adjacent land; or
- b) the comprehensive development and regeneration of a wider area as provided for in a master plan, strategy or development brief approved by the Council.

152 This policy applies to all development involving one or more new buildings. The Council encourages a comprehensive approach to redevelopment and regeneration wherever possible, and the preparation of development frameworks or master plans, to identify the full design potential for creating successful places. Piecemeal development is less likely to lead to the creation of well-defined and cohesive networks of streets and spaces. In exceptional cases, it may be necessary for the Council to use its powers of compulsory purchase to assemble a site for development and enable a satisfactory outcome to be achieved.

### Policy Des 3 Development Design - Incorporating and Enhancing Existing and Potential Features

Planning permission will be granted for development where it is demonstrated that existing characteristics and features worthy of retention on the site and in the surrounding area, have been identified, incorporated and enhanced through its design.

153 This policy is relevant for all new development involving one new building or more. Its aim is to ensure that development proposals are informed by a detailed analysis and understanding of the site. The incorporation of existing features including built structures, archaeology, trees and woodland, landscape character, views and biodiversity can enhance a development's sense of place and contribution to the wider habitat and green network. Where practicable, proposals should provide new habitat to further the conservation of biodiversity.

### Policy Des 4 Development Design – Impact on Setting

Planning permission will be granted for development where it is demonstrated that it will have a positive impact on its surroundings, including the character of the wider townscape and landscape, and impact on existing views, having regard to:

- a) height and form
- b) scale and proportions, including the spaces between buildings
- c) position of buildings and other features on the site
- d) materials and detailing

154 This policy applies to all new development of one or more buildings. Where the built environment is of high quality and has a settled townscape character, new development proposals will be expected to have similar characteristics to the surrounding buildings and urban grain. Where the surrounding development is fragmented or of poor quality, development proposals should help repair the urban fabric, establish model forms of development and generate coherence and distinctiveness – a sense of place. The siting and design of development should also be guided by views within the wider landscape and an understanding of local landscape character, including important topographical features, e.g. prominent ridges, valleys and patterns of vegetation.

### Policy Des 11 Tall Buildings – Skyline and Key Views

Planning permission will only be granted for development which rises above the building height prevailing generally in the surrounding area where:

- a) a landmark is to be created that enhances the skyline and surrounding townscape and is justified by the proposed use
- b) the scale of the building is appropriate in its context
- c) there would be no adverse impact on important views of landmark buildings, the historic skyline, landscape features in the urban area or the landscape setting of the city, including the Firth of Forth.

166 Proposals for development that would be conspicuous in iconic views of the city will be subject to special scrutiny. This is necessary to protect some of the city's most striking visual characteristics, the views available from many vantage points within the city and beyond, of landmark buildings, the city's historic skyline, undeveloped hillsides within the urban area and the hills, open countryside and the Firth of Forth which create a unique landscape setting for the city. In addition, the height of new buildings may need to be suppressed where necessary so that the city's topography and valley features continue to be reflected in roofscapes. This policy will play an important role in protecting the setting of the World Heritage Sites.

167 A study undertaken for the Council identifies key public viewpoints and is used in assessing proposals for high buildings. Further advice is provided in Council guidance.

### Policy Des 12 Alterations and Extensions

Planning permission will be granted for alterations and extensions to existing buildings which:

- a) in their design and form, choice of materials and positioning are compatible with the character of the existing building
- b) will not result in an unreasonable loss of privacy or natural light to neighbouring properties
- c) will not be detrimental to neighbourhood amenity and character

168 Every change to a building, street or space has the potential to enrich or, if poorly designed, impoverish a part of the public realm. The impact of a proposal on the appearance and character of the existing building and street scene generally must be satisfactory and there should be no unreasonable loss of amenity and privacy for immediate neighbours.

### Policy Des 13 Shopfronts

Planning permission will be granted for alterations to shopfronts which are improvements on what already exists and relate sensitively and harmoniously to the building as a whole. Particular care will be taken over proposals for the installation of illuminated advertising panels and projecting signs, blinds, canopies, security grills and shutters to avoid harm to the visual amenity of shopping streets or the character of historic environments.

169 Shopfront design, shop designs and shopfront advertising play an important role in the visual environment of the city. Important traditional or original features on older buildings, such as stall risers, fascias and structural framing of entrances and shop windows, should be retained and incorporated into the design. In conservation areas and on listed buildings, design and materials used will be expected to be of a high standard, and not damaging to existing fabric of buildings or wider character. Detailed advice on shopfronts is provided in Council guidance.

## 3 Caring for the Environment

170 Protection of the historic and natural environment for the benefit of future generations is an important role of the planning system. The purpose and context of Edinburgh's most important environmental designations including the World Heritage Site, Conservation Areas and Green Belt are explained in Part 1 of the plan. Policies Env 1 – Env 22 will be used in assessing planning applications to meet the following objectives;

### Objectives

- To ensure that the unique qualities of the city, its historic environment and the character of its urban areas are safeguarded for the future
- To protect important landscape and natural features of the environment, including the city's Green Belt setting
- To protect and enhance the nature conservation and biodiversity interest of the city
- To protect natural resources

### The Historic Environment

171 Policies Env 1 – Env 6 will be used to assess proposals affecting Edinburgh's world heritage sites, conservation areas and listed buildings. The Council's guidance on Conservation Areas and Listed Buildings provide further advice. Policy Env 7 relates to historic landscapes and policies Env 8 and 9 cover archaeological resources.

#### Policy Env 1 World Heritage Sites

Development which would harm the qualities which justified the inscription of the Old and New Towns of Edinburgh and/or the Forth Bridge as World Heritage Sites or would have a detrimental impact on a Site's setting will not be permitted.

172 This policy requires development to respect and protect the outstanding universal values of the World Heritage Sites and their settings. Setting may include sites in the immediate vicinity, viewpoints identified in the key views study and prominent landscape features throughout the city.

#### Policy Env 2 Listed Buildings - Demolition

Proposals for the total or substantial demolition of a listed building will only be supported in exceptional circumstances, taking into account:

- a) the condition of the building and the cost of repairing and maintaining it in relation to its importance and to the value to be derived from its continued use
- b) the adequacy of efforts to retain the building in, or adapt it to, a use that will safeguard its future, including its marketing at a price reflecting its location and condition to potential restoring purchasers for a reasonable period.
- c) the merits of alternative proposals for the site and whether the public benefits to be derived from allowing demolition outweigh the loss.

### Policy Env 3 Listed Buildings - Setting

Development within the curtilage or affecting the setting of a listed building will be permitted only if not detrimental to the architectural character, appearance or historic interest of the building, or to its setting.

### Policy Env 4 Listed Buildings – Alterations and Extensions

Proposals to alter or extend a listed building will be permitted where

- a) those alterations or extensions are justified;
- b) there will be no unnecessary damage to historic structures or diminution of its interest; and
- c) where any additions are in keeping with other parts of the building.

173 In determining applications for planning permission or listed building consent, the Council is required to have special regard to the desirability of preserving the building, its setting or any features of special architectural or historic interest that it possesses. Applications for the demolition or substantial alteration of a listed building must be accompanied by a thorough structural condition report demonstrating that the proposals are necessary or justified. Information must be provided on the proposed replacement building; these should be of comparable quality in terms of construction and design. The loss of a listed building will only be justified in exceptional circumstances. Scottish Historic Environment Policy (SHEP) and Council guidance provide further advice for applications relating to Listed Buildings.

### Policy Env 5 Conservation Areas – Demolition of Buildings

Proposals for the demolition of an unlisted building within a conservation area but which is considered to make a positive contribution to the character of the area will only be permitted in exceptional circumstances and after taking into account the considerations set out in Policy Env 2 above.

Proposals for the demolition of any building within a conservation area, whether listed or not, will not normally be permitted unless a detailed planning application is approved for a replacement building which enhances or preserves the character of the area or, if acceptable, for the landscaping of the site.

### Policy Env 6 Conservation Areas - Development

Development within a conservation area or affecting its setting will be permitted which:

- a) preserves or enhances the special character or appearance of the conservation area and is consistent with the relevant conservation area character appraisal
- b) preserves trees, hedges, boundary walls, railings, paving and other features which contribute positively to the character of the area and
- c) demonstrates high standards of design and utilises materials appropriate to the historic environment.

Planning applications should be submitted in a sufficiently detailed form for the effect of the development proposal on the character and appearance of the area to be assessed.

174 The purpose of the above policies is to protect and, where possible, enhance the character and appearance of Edinburgh's many conservation areas. By controlling the demolition of buildings and ensuring new development is of appropriate design and quality, their aim is to protect the City's heritage for future generations.

175 Applications for demolition will be permitted only where this does not erode the character and appearance of the conservation area. The general presumption will be in favour of retaining buildings that make a positive contribution to the conservation area, particularly where it can be demonstrated that the building is able to support a new viable use, or might be capable of such in the future. Conservation Area Consent may be subject to conditions or a legal agreement to link demolition works to the

provision of the proposed replacement building or, in exceptional circumstances, to require temporary landscaping.

- 176 Design statements are required for new developments in a conservation area. This statement should include reference to the relevant Conservation Area Character Appraisal and Council guidance on Conservation Areas and Listed Buildings and show how these have informed the proposed design.

### Policy Env 7 Historic Gardens and Designed Landscapes

Development will only be permitted where there is no detrimental impact on the character of a site recorded in the Inventory of Gardens and Designed Landscapes, adverse effects on its setting or upon component features which contribute to its value. Elsewhere, adverse effects on historic landscape features should be minimised. Restoration of Inventory sites and other historic landscape features is encouraged.

- 177 This policy aims to protect sites included in the national Inventory of Gardens and Designed Landscapes (shown on the Proposals Map) and other historic landscape features elsewhere across the Council area. An understanding of how the landscape has evolved can help inform a development proposal. A historical landscape appraisal may be requested from applicants to allow full assessment of the implications of development and identify restoration opportunities.

### Policy Env 8 Protection of Important Remains

Development will not be permitted which would:

- a) adversely affect a scheduled monument or other nationally important archaeological remains, or the integrity of their setting
- b) damage or destroy non-designated archaeological remains which the Council considers should be preserved in situ.

### Policy Env 9 Development of Sites of Archaeological Significance

Planning permission will be granted for development on sites of known or suspected archaeological significance if it can be concluded from information derived from a desk-based assessment and, if requested by the Council, a field evaluation, that either:

- a) no significant archaeological features are likely to be affected by the development or
- b) any significant archaeological features will be preserved in situ and, if necessary, in an appropriate setting with provision for public access and interpretation or
- c) the benefits of allowing the proposed development outweigh the importance of preserving the remains in situ. The applicant will then be required to make provision for archaeological excavation, recording, and analysis, and publication of the results before development starts, all to be in accordance with a programme of works agreed with the Council.

- 178 The objective of the above policies is to protect and enhance archaeological remains, where possible by preservation in situ in an appropriate setting. In some cases, depending on the nature of the remains and character of the site, the Council may require provision for public access and interpretation as part of the proposed development. When preservation in situ is not possible, recording and/or excavation followed by analysis and publication of the results will be required.

- 179 Developers should seek early advice from the Council's Archaeologist for sites where historic remains are known or thought likely to exist. Where a development may affect a scheduled monument or its setting, early contact should be made with Historic Environment Scotland.

### Policy Hou 4 Housing Density

The Council will seek an appropriate density of development on each site having regard to:

- a) its characteristics and those of the surrounding area
- b) the need to create an attractive residential environment and safeguard living conditions within the development
- c) the accessibility of the site includes access to public transport
- d) the need to encourage and support the provision of local facilities necessary to high quality urban living.

Higher densities will be appropriate within the City Centre and other areas where a good level of public transport accessibility exists or is to be provided. In established residential areas, proposals will not be permitted which would result in unacceptable damage to local character, environmental quality or residential amenity.

228 The aim of this policy is to promote an appropriate density of development, taking account of site characteristics and location. There are many benefits of higher density development – it makes efficient use of urban land, helps maintain the vitality and viability of local services and encourages the effective provision of public transport. However higher densities are not always appropriate. Particular care will be taken in established residential areas to avoid inappropriate densities.

### Policy Hou 5 Conversion to Housing

Planning permission will be granted for the change of use of existing buildings in non-residential use to housing, provided:

- a) a satisfactory residential environment can be achieved
- b) housing would be compatible with nearby uses
- c) appropriate open space, amenity and car and cycle parking standards are met
- d) the change of use is acceptable having regard to other policies in this plan including those that seek to safeguard or provide for important or vulnerable uses.

229 A significant contribution to housing needs has been made over the years by the conversion of redundant commercial buildings to housing. This has included office buildings in the New Town which were originally houses, warehouses in Leith and vacant hospital and school buildings. The recycling of buildings achieves sustainability goals and provides the essential means by which the historic character of different localities can be maintained. It can help to create the high density, mixed use environments which are appropriate for central sites. It is an objective of the Plan to resist the conversion of empty shop units to residential use, and to safeguard these for shopping and small business use (see Policy Ret 10). However, conversions to residential use could be supported where the shop unit has been vacant for a significant period of time and been actively marketed, where there is local need and demand for a range of housing types and for town centre living.

- 243 This policy applies to the following eight town centres – Corstorphine, Gorgie/Dalry, Leith/Leith Walk, Morningside/Bruntsfield, Nicolson Street/Clerk Street, Portobello, Stockbridge and Tollcross. The boundaries of each centre are shown on the Proposals Map and will be kept under review. Boundary changes may be recommended through the preparation of supplementary guidance
- 244 This policy supports proposals for retail development in or adjacent to Edinburgh's eight town centres in recognition of their important role in providing shopping and services in locations well served by public transport. Development opportunities are seldom available within town centres, especially to meet the requirements of larger stores, and are more likely to arise on edge of town centre sites. Edge of centre development should benefit rather than compete with the town centre. Such proposals will need to demonstrate how the development integrates with the existing centre in terms of appearance and pedestrian connections.

## Commercial Centres

### Policy Ret 4 Commercial Centres

Proposals for additional retail floorspace in a Commercial Centre (see Table 6 and Proposals Map) will not be supported unless it can be demonstrated that:

- a) the proposal will address a quantitative or qualitative deficiency within its catchment area, and will be restricted to a scale which makes good this deficiency
  - b) all potential town centre and edge of town centre options (including the city centre retail core) have been thoroughly assessed and can be discounted as unsuitable or unavailable
  - c) the proposal will not have significant adverse individual or cumulative impacts on any other town, local or commercial centre and, in particular, will not impact adversely on the strategy and objectives for enhancing the vitality and retail attractiveness of the city centre retail core
- d) the scale, format and type of development proposed is compatible with the future role of the centre as defined in relevant planning consents and outlined in Table 7.
  - e) the proposal will assist in making the centre more accessible by public transport, walking and cycling, contribute to less car travel, and will improve the appearance and environment of the centre.
- 245 Policy Ret 4 covers seven commercial centres in Edinburgh – Cameron Toll, Craighleith, Hermiston Gait, Meadowbank, Newcraighall/The Jewel (which includes Fort Kinnaird retail park and an Asda superstore) Ocean Terminal and The Gyle. The purpose of this policy is to indicate the circumstances in which additional retail floorspace in a commercial centre will be supported.
- 246 The plan supports and values the role of the commercial centres in providing shopping and leisure facilities. However, within a context of the economic downturn and anticipated decline in retail spending, there is not expected to be any significant gap in retail floorspace provision in the LDP period to justify expansion of any of the commercial centres.
- 247 The effect of this policy is to complement policies Ret 2 and Ret 3 by directing any new retail development to the city or town centres in the first instance. This approach will help support the role of the city centre and town centres and promote investor confidence in these locations.
- 248 Where there may be an opportunity for a centre to continue to evolve to meet the needs of the population it serves, this is indicated in Table 7 Commercial Centres.

## Local Centres

### Policy Ret 5 Local Centres

Planning permission for retail development in or on the edge of a local centre will be

permitted provided the proposal:

- a) can be satisfactorily integrated into the centre
- b) is compatible, in terms of scale and type, with the character and function of the centre
- c) makes a positive contribution to the shopping environment and appearance of the centre
- d) would not have a significant adverse impact on the city centre retail core or any town or local centre
- e) is easily accessible by public transport, foot and cycle.

Proposals for non-retail development in a local centre which would have a detrimental impact on the function of the centre will not be permitted.

249 This policy applies to the local centres listed in Table 6 in Part 1 Section 3 and in Appendix B. It supports new retailing development of an appropriate scale and type in local centres and protects local centres from development which would threaten their future existence or undermine their role. 'Edge of local centre' will only apply to sites physically adjoining the existing boundary of the centre. This policy also protects the network of existing local centres as these help contribute to the overall LDP objective relating to sustainable communities and quality of life.

### Out-of-Centre Development

250 New retail development should be in locations which can be easily accessed on foot, by cycle and by public transport as well as by car and preferably in close proximity to other local services and community facilities to allow linked trips. This helps explain why existing and proposed centres are the preferred locations for new retail development. Policy Ret 6 will be used to assess proposals for retail development in out-of-centre locations.

### Policy Ret 6 Out-of-Centre Development

Proposals for retail development in an out-of-centre location will only be permitted provided it has been demonstrated that:

- a) the proposal will address a quantitative or qualitative deficiency or will meet the needs of an expanding residential or working population within its catchment area
- b) all potential sites, either within or on the edge of an identified centre (see Table 6), have been assessed and can be discounted as unsuitable or unavailable
- c) the proposal will not have a significant adverse effect, either individually or cumulatively with other developments, on the vitality and viability of any existing centre.
- d) the site is or can be made easily accessible by a choice of transport modes and will reduce the length and overall number of shopping trips made by car.

251 This policy recognises that in exceptional circumstances, there may be retail proposals that can justify an out of centre location, for example smaller units to meet the needs of a growing population or where a gap in provision can be demonstrated. Proposals for non-local provision, for example a free-standing retail warehouse which would trade over a wide area and provide essentially for car-borne shopping, would not be acceptable in terms of this policy.

252 There are benefits in providing small scale, convenience stores (up to 250sq.m. gross floorspace) in locations easily accessible on foot or by cycle. These will complement the role of the identified centres and therefore for such proposals it is not necessary to demonstrate that there is no site suitable and available in or adjacent to an identified centre (criterion b) in Policy Ret 6). The other requirements of Policy Ret 6 do need to be satisfied. This will allow, for example, large scale housing proposals to include local shopping facilities to serve new residents. This will also help meet create more sustainable communities, one of the overall objectives of the plan.

## Entertainment and Leisure Uses

253 Policies Ret 7 and Ret 8 apply a sequential approach to the location of entertainment and leisure uses such as cinemas, theatres, restaurants, night clubs, ten pin bowling, bingo halls and soft play centres. These policies will also be applied to proposals for visitor attractions supporting Edinburgh's role as a major tourist destination and cultural centre of international importance.

254 The preferred locations for entertainment and leisure development are the City Centre (as shown on the Proposals Map), the eight nine town centres and as part of mixed use regeneration proposals at Leith Waterfront and Granton Waterfront.

### Policy Ret 7 Entertainment and Leisure Developments - Preferred Locations

Planning permission will be granted for high quality, well designed arts, leisure and entertainment facilities and visitor attractions in the City Centre, at Leith and Granton Waterfront and in a town centre, provided:

- a) the proposal can be integrated satisfactorily into its surroundings with attractive frontages to a high quality of design that safeguards existing character
- b) the proposal is compatible with surrounding uses and will not lead to a significant increase in noise, disturbance and on-street activity at unsocial hours to the detriment of living conditions for nearby residents
- c) the development will be easily accessible by public transport, foot and cycle.

255 The purpose of this policy is to identify the preferred locations for entertainment and leisure development and to ensure that such proposals make a positive contribution in terms of the type of use and quality of design, are in accessible locations and do not introduce unacceptable noise and late night disturbance.

256 The City Centre has a mixed use character and provides a wide range of leisure

uses, arts and cultural establishments and pubs and restaurants. Whilst recognising the importance of such uses to the local and national economy, the policy takes account of potential impact on the environment and local residents.

257 Entertainment and leisure uses will be a key component of the major regeneration proposals at Leith Waterfront and Granton Waterfront and are also appropriate in town centres, contributing to the diversity and vitality.

### Policy Ret 8 Entertainment and Leisure Developments – Other Locations

Planning permission will be granted for entertainment and leisure developments in other locations provided:

- a) all potential City Centre, or town centre options have been thoroughly assessed and can be discounted as unsuitable or unavailable
- b) the site is or will be made easily accessible by a choice of means of transport and not lead to an unacceptable increase in traffic locally
- c) the proposal can be integrated satisfactorily into its surroundings with attractive frontages to a high quality of design that safeguards existing character
- d) the proposal is compatible with surrounding uses and will not lead to a significant increase in noise, disturbance and on-street activity at unsocial hours to the detriment of living conditions for nearby residents.

258 This policy sets out criteria for assessing proposals for entertainment and leisure developments in other locations, such as commercial centres, local centres and elsewhere in the urban area. Key considerations include accessibility by public transport, design quality and impact on the character of the area and local residents.

## Alternative Use of Shop Units

### Policy Ret 9 Alternative Use of Shop Units in Defined Centres

In the City Centre Retail Core and town centres, change of use proposals which would undermine the retailing function of the centre will not be permitted. Detailed criteria for assessing proposals for the change of use of a shop unit to a non-shop use will be set out in supplementary guidance. Supplementary Guidance will detail an approach tailored to different parts of the city centre retail core and each town centre to be informed by town centre health checks which will assess the centres strengths, vitality and viability, weaknesses and resiliencies.

The change of use of a shop unit in a local centre to a non-shop use will be permitted provided:

- a) the change of use would not result in four or more consecutive non-shop uses and;
- b) the proposal is for an appropriate commercial, community or business use, which would complement the character of the centre and would not be detrimental to its vitality and viability.

259 This plan aims to protect the important retailing function of defined centres but recognises the benefits of a wide range of complementary service, leisure and other community uses. The right mix of shopping and other uses will vary in the different centres and in the case of the city and town centres, in different parts of the centre. The policy applies to ground floor units only or basement/first floor units that are directly accessed from the pavement.

260 Within the City Centre Retail Core, a strong, high quality retail offer is a key aspect of sustaining and enhancing the city centre and policies are required to ensure that shopping continues to be the predominant use. However in order to achieve a diverse, thriving and welcoming city, a more flexible approach to the introduction of

complementary uses that support the main shopping function and encourage use into the evening is proposed. Supplementary guidance will be prepared to guide the mix of uses in different parts of the City Centre Retail Core and set out criteria for assessing proposals for uses other than shops.

261 Previous local plans incorporated a standard approach to change of use applications in town centres based on identifying primary frontages where there should be a greater proportion of units in shop use. However, each town centre is different in terms of the current mix of uses and how well it is meeting the needs of those who live, work and shop in the surrounding area. In order to take account of these differences, this plan proposes a tailored approach for each town centre. Separate supplementary guidance will be produced to guide change of use applications in each of the nine town centres. The supplementary guidance may also recommend changes to the town centre boundaries to be included in the next Local Development Plan.

262 The policy aims to avoid areas of 'dead frontage' and reduced pedestrian flow which would detract from the character and vitality of the centre by requiring that at least one unit in every four is in shop use. Beyond this requirement, the policy applies a flexible approach to change of use applications in local centres provided the use will be beneficial to the local community such as providing services, hot food or entertainment facilities. In local centres, former shop units may also be suitable for business use, providing a beneficial use for vacant properties and opportunities for small start up businesses and job creation close to where people live.

### Policy Ret 10 Alternative Use of Shop Units in Other Locations

Outwith defined centres, planning applications for the change of use of a shop unit will be determined having regard to the following:
