

Item no 5.3

QUESTION NO 3

By Councillor Osler for answer by the Convener of the Transport and Environment Committee at a meeting of the Council on 7 February 2019

In November 2017 I asked a question of the Convener of Transport and Environment, regarding the number of pedestrian crossings in Edinburgh which had been fitted with a pedestrian signalling box with rotating cones underneath which enable partially sighted individuals to know when it is safe to cross. As a follow up I asked how many of these cones were actually functioning. The Convener was unsure at the time but assured me that she would come back to me in an individual basis and if necessary to the Chamber, with information about the working cones. In her words "If there is a problem, a widespread problem, we'll put in place a programme to make sure that those are fitted correctly."

Question (1) Has any further research been done on the 409 traffic signal installations in the city that have rotating cones to see if they are functioning?

Answer (1)

Question (2) Has a programme been put into place to make sure that they are fitted correctly?

Answer (2)
