

Report

IJB Risk Register

Edinburgh Integration Joint Board

21 June 2019

Executive Summary

1. The purpose of this report is to submit the current version of the Integration Joint Board (IJB) risk register for consideration and to update the board on the processes which are being established to manage, mitigate and escalate risks.

Recommendations

2. The Edinburgh Integration Joint Board is asked to:
 - a) note the continued development of the IJB risk register and associated action plan;
 - b) note the introduction of risk assurance level reporting; and
 - c) note that the latest version of the register has been scrutinised by the Audit and Risk Committee on 31 May 2019.

Background

3. As a key part of its governance process, the risk register examines the risks that impact the IJB's ability to deliver its strategic plan. The IJB's Audit and Risk Committee (ARC) oversees risk management arrangements; this includes receipt, review and scrutiny of reports on strategic risks and escalation of any issues that require to be brought to the IJB's attention.
4. On the 15th June 2018, IJB members requested that the risk register should be submitted to the board every six months. This report is in answer to this request.

Main report

5. The IJB risk register, a cornerstone of a comprehensive risk process, identifies and assesses risks, and clearly articulates the controls in place to manage them. Since the inception of the IJB the risk register has been presented in a

number of different ways and both the ARC and the IJB have agreed the current format and approach.

IJB risk register update

6. Since the last IJB update in December 2018, the assurance levels for risk have been assessed. The objective of this work was to examine available evidence in order to provide assurance that the identified mitigating controls are in place and operating effectively. Prior to this, the adequacy of current control had been marked as '*uncertain*'. This was because the impact of controls for each risk was not known and that more work was required to identify the current situation.
7. Assurance levels are defined as follows:
Significant: the IJB Audit and Risk Committee members can take reasonable assurance that the system of control achieves will achieve the purpose that it is designed to deliver. There may be an *insignificant* amount of *residual* risk or none at all.
Moderate: members can take reasonable assurance that controls upon which the organisation relies to manage the risk(s) are in the main suitably designed and effectively applied. There remains a *moderate* amount of *residual* risk.
Limited: members can take some assurance from the systems of control in place to manage the risk(s), but there remains a *significant* amount of *residual* risk which requires action to be taken.
None: members cannot take any assurance from the information provided. There remains a *significant* amount of *residual* risk.
8. Following this work, the residual risk (i.e. the risk remaining taking into account design and effectiveness of the controls) will be considered in comparison to our target risk, and appropriate actions and timeframes agreed to ensure that target risk levels are achieved and maintained.
9. The risk register dashboard has now been changed to report on current assurance levels. Having now established a baseline on current assurance levels, these will be re-assessed every quarter. Any changes in levels will be highlighted in the dashboard.

Next Steps

10. The Chief Officer and the Executive Team intends on holding an IJB Risk Workshop within the next three months. It will be an opportunity to re-assess risk appetite, review owners and further develop mitigation plans.

- Independent external review of IA is performed every 5 years in line with Public Sector Internal Audit Standards (PSIAS) requirements (last review was performed 2016/17).
- Annual Internal Audit opinion for the EIJB is required to highlight any instance of non-compliance with the PSIAS.
- The governance statement (incorporated in the annual accounts) and the annual IA opinion is subject to review and scrutiny by the EIJB A&R Committee.
- A clearly established follow-up process to ensure that all IA findings raised are appropriately closed and risks mitigated – an area of non PSIAS compliance for 2017/18.
- IA progress reports provided to the Audit and Risk Committee quarterly, updating progress on the audit plan and also the status of open and overdue IA findings.
