Land at Cammo Field West of Maybury Road Edinburgh EH4 8AN

Scottish Government Property Division is making this submission on behalf of Scottish Ministers who are the registered title holders.

1)The Site

1.1) Location

The subjects are located on the western edge of Edinburgh with access from the A902 which runs between Queensferry Road in the north and the A8 Glasgow Road to the south. Land to the east of the Maybury Road is predominantly residential in nature and land to the west is predominantly undeveloped as it forms part of the Green Belt, however, this designation has been under pressure for some time and the nature of the area is changing. The site is bounded by Cammo Walk to the west and Maybury Road to the east. Pedestrian and cyclist access can be taken from Cammo Walk and vehicular access from Maybury Road.

1.2) Description

The subjects comprise an area of circa 5 hectares and the site is roughly triangular in shape. In terms of topography, most of the site is gently undulating and the land lies between forty and sixty metres above sea level. The site contains no significant landscape features of note. There are no historic records of mineral workings or mining and the risk of contamination is considered to be negligible. There are no infrastructure constraints. Water supply, drainage, education capacity, electricity and telecoms are all either available or can be made available.

The site and its surrounds are clearly highlighted on the plan provided at Appendix 1.

2) Background

The field has been surplus to requirements for several years since Science & Advice for Scottish Agriculture (SASA) consolidated their operations at their new headquarter site at Roddinglaw and is currently lying fallow. As surplus land, under the Scottish Public Finance Manual, Scottish Ministers are obliged to dispose of the land but first clarity is required as to what planning consents will be available.

Property Division have held several meetings with Edinburgh Council Estates and Planning Departments since the land became surplus. This resulted in a part sale of the land to City of Edinburgh Council in 2015 to accommodate a cycle path and for access to be allowed to Network Rail as shown on the plan (Appendix 2) but also retaining rights of access to Scottish Ministers. Unfortunately, despite our best endeavours, it has not proved possible to hold any further meetings to discuss the future of our retained land.

3) Surrounding Area

There have been numerous planning applications in the vicinity and the following are of note:

- The Edinburgh Local Development Plan (LDP) housing allocation HSG 20, Cammo lies to the north beyond the Scottish Government Land. On the 6th January 2020, planning permission was granted for a 655-unit residential development (18/01755/FUL) on the site. CALA and David Wilson Homes have since commenced development on the site.
- To the south, beyond Craigs Road, lies the Edinburgh LDP housing allocation HSG19, Maybury. On the 27th September 2019, planning permission in principle was granted for a residential development comprising a maximum of 1400 units, and ancillary commercial uses (16/04738/PPP).
- To the south-east, on land forming part of LDP housing allocation HSG19, Taylor Wimpey were granted planning permission in principle for a residential development comprising approximately 250 units on the 3rd October 2019 (16/05681/PPP). They have since submitted an AMC application (19/05051/AMC) for 250 homes.

We have been provided with a copy of the submission being made to this consultation by West Craigs Limited (WCL) prepared by Iceni Projects "Land North of Craigs Road Edinburgh" in respect of the land adjacent to ours, which sets out the situation as regards Planning and Housing requirements in the area, which we understand to be factually correct. The land owned by WCL has an indicative development capacity of 350-500 homes.

4) Conclusion

In short, the site is conveniently and sustainably located within an area of significant change where, because of ongoing and planned development, the site's immediate surroundings are increasingly urban and dominated by residential use.

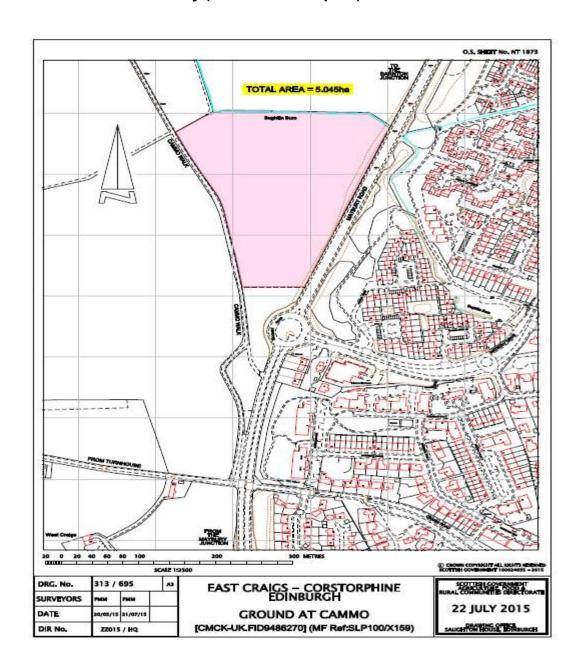

It is appreciated that the land is currently in the designated Green Belt but given the changes, both in planning consents granted and being promoted in the surrounding area, consideration has to be given to the future zoning of our land, as it cannot be considered in isolation. This could include Housing, both mainstream and social, or to accommodate planning obligations related to adjacent developments Accordingly, we request that CEC give full consideration to the future use of the subject land to be included in the finalised Local Development Plan (City Plan 2030).
