

## Food Hygiene Information Scheme -The City of Edinburgh Council

This scheme is designed to give straightforward information about how each food outlet fared at its last food hygiene inspection carried out by its local authority. The inspection outcome applies to a business trading at a particular address, so that a change of business operator at a given address will require a fresh assessment.

**Pass** A 'Pass' indicates that the business broadly met the legal requirements. These requirements include the conditions found and the management procedures in place for providing safe food.

**Improvement Required** Where a business has failed to meet these requirements it will be issued with an 'Improvement Required' certificate.

**Exempt Premises** A very small number of premises may be registered as food businesses in circumstances where it is unlikely that customers will view them as food premises. The assessment for such premises will have concluded that the food safety risk is negligible.

In such cases (and only with the agreement of the business), a certificate will not be issued and the information on the local authority website will indicate that the business is currently exempt from the food hygiene information scheme.

**Awaiting inspection** Where a business has not yet been inspected, it will be issued with a temporary certificate advising consumers of that fact. This will appear as 'Awaiting Inspection' on the website. Premises will also require to be re-inspected where they have changed ownership.

Pilot Area: Newtown, Tollcross, and Holyrood wards.

Business	Status	Inspection Date
