Choice 1 A

We want to connect our places, parks and green spaces together as part of a city-wide, regional, and national green network. We want new development to connect to, and deliver this network. Do you agree with this? - Select support / don't support

Short Response Yes

Explanation

Ratho & District Community Council covers a largely rural area situated in the West of Edinburgh which has seen significant population growth in recent years. Even after completion of some 250 houses, the village of Ratho is relatively poorly served by public transport. Other smaller communities in our area such as Cliftonhall, Roddinglaw and Overshiel have no public transport services at all. The removal of the city centre direct bus service from Ratho some five vears ago has resulted in a poorly utilised part-service with many two-car households having little alternative to driving on narrow rural roads to meet their busy work and social needs. Without an improved direct bus service to the city centre Ratho residents will continue to drive to the Park & Ride facilities to catch speedier bus and tram services. During a recent survey conducted by the Community Council it was found that the vast majority of Ratho residents would prefer the reinstatement of a direct bus service. The recent decision, however, by the City of Edinburgh Council to accept a tender from First Bus (change from current Lothian Buses) to continue the part-service for the next four years is a huge disappointment to the Community Council and local residents and this surely presents a disincentive for further economic development in the village.

Choice 1 B

We want to change our policy to require all development (including change of use) to include green and blue infrastructure. Do you agree with this? - Support / Object

Choice 14 A

We want City Plan 2030 to support the best use of existing public transport infrastructure in West Edinburgh and accommodate the development of a mix of uses to support inclusive, sustainable growth. We will do this through 'an area of search' which allows a wide consideration of future uses within West Edinburgh without being tied to individual sites. Do you support this approach? - Yes / No

Short Response Yes

Explanation

Ratho & District Community Council recognises the significance of the area in transport and economic development terms. The successful tram services, the Gateway rail interchange and other good public transport facilities already provide good linkage to Edinburgh Airport and Royal Highland Centre and they clearly provide an opportunity for further growth in the local area. Ratho & District Community Council is supportive of the proposed new eastern road access arrangements to Edinburgh Airport and of the intention to maximise business growth opportunities at the International Business Gateway and at Crosswinds. The Community Council are also keen to see progress with planned housing developments at Ratho Station and at the former Continental Tyre Factory at Old Liston Road, Newbridge.

Choice 14 B

We want to remove the safeguard in the existing plan for the Royal Highland Showground site to the south of the A8 at Norton Park and allocate the site for other uses. Do vou agree with this approach? - Yes / No

Choices for City Plan 2030

Ratho & District Community Council welcomes the opportunity to work with the City of Edinburgh Council, other community councils and the many other stakeholders to review the Edinburgh Local Development Plan. We offer the following initial comments about your preferred approach to changing policy in the new plan as set out in "Choices for City Plan 2030" document as follows:

It should be said from the outset that constructive comment at this time on the "Choices" and the future management of anticipated development needs in our city over the next ten years is difficult during a period of unprecedented pandemic emergency measures, coupled with ever emerging Climate Change and Brexit challenges, knowing that such influencing factors will inevitably create momentum for further review and change to the Plan. Having said that Ratho & District Community Council fully supports your ambitions to promote innovation, learning and culture and to maintain a sustainable, healthy and connected city with the right types and quality of development in the right locations and with the right infrastructure.

Our specific comments on the document are as follows:

Choice 1 – Making Edinburgh a sustainable, active and connected city

(a) Connected Places

Ratho & District Community Council covers a largely rural area situated in the West of Edinburgh which has seen significant population growth in recent years. Even after completion of some 250 houses, the village of Ratho is relatively poorly served by public transport. Other smaller communities in our area such as Cliftonhall, Roddinglaw and Overshiel have no public transport services at all. The removal of the city centre direct bus service from Ratho some five years ago has resulted in a poorly utilised part-service with many two-car households having little alternative to driving on narrow rural roads to meet their busy work and social needs. Without an improved direct bus service to the city centre Ratho residents will continue to drive to the Park & Ride facilities to catch speedier bus and tram services. During a recent survey conducted by the Community Council it was found that the vast majority of Ratho residents would prefer the reinstatement of a direct bus service. The recent decision, however, by the City of Edinburgh Council to accept a tender from First Bus (change from current Lothian Buses) to continue the part-service for the next four years is a huge disappointment to the Community Council and local residents and this surely presents a disincentive for further economic development in the village.

(b) Brownfield Land

The Community Council supports the development of brownfield sites provided adequate infrastructure is in place first.

(c) Green and Blue Environment

The Community Council is supportive of green and blue infrastructure but highlights the need to address airport safety (attracting birds) and the need to protect public safety from nature/sustainable drainage and open water systems.

(d) Management of Open Spaces

The Community Council favours the option of adoption by the Council rather than private factoring arrangements.

Choice 2 – Improving the quality, density and accessibility of development

(a) **Development Density**

The Community Council supports the ambition to make best use of limited space in our city but, to maximise such benefits, recognises the need for sufficient infrastructure including public transport availability.

(b) Active Travel

Ratho & District Community Council is currently experiencing a situation where road adjustment measures undertaken by your Council (Active Travel) to enhance a local cycle route is seriously undermining the safety of other road users. Whilst being generally supportive of your ambition to develop and maintain a city-wide network of multi-use green spaces to encourage more walking, cycling and sport, Ratho & District Community Council highlights the need for local consultation prior to such developments and for any agreed cost-effective measures to take account of the safety implications for all road users. It must be borne in mind that not every resident or visitor to Edinburgh can cycle or walk to their desired destinations because of disability or age.

Choice 3 - Delivering carbon neutral buildings

(a) Ratho & District Community Council supports the Council's core vision and strategic objective to achieve carbon neutral status but finds it hard to see, realistically in the current environment, how this can be achieved by 2030.

Choice 4 – Creating Place Briefs and supporting the use of Local Place Plans in our communities

(a) Place Briefs

Ratho & District Council welcomes the ambition for improved local consultation and supports the idea of a more collaborative and inclusive approach to planning at local level. It should be borne in mind however that Community Councils have limited resources and time and that the introduction of Place Briefs, as a mandatory requirement, gives us some cause for concern. Effective consultation with local communities can be difficult to achieve and, in order to succeed, the process needs to be seen to be fair and open in terms of options and agreed outcomes.

Choice 5 – Delivering Community Infrastructure

(a) Transport Infrastructure

It must be borne in mind that the needs of the motorist must to be considered and that road infrastructure improvements will be required and must be implemented before development starts in many rural areas. There is also a need for statutory guidance to ensure that developers adhere to their contribution commitments.

Choice 6 – Creating places that focus on people, not cars

(a) **Public Transport**

From our experience in Ratho (see Choices 1 (a) above) it is important to understand that people will only refrain from use of their cars if the local bus service is frequent, direct and reliable.

(b) Ingliston Park & Ride

Due to the success of the Edinburgh tram services, the park & ride facilities at Ingliston are now extensively used by West Lothian commuters to the extent that local residents are regularly unable to find parking spaces. The regular over-utilisation of the present parking facilities acts as a disincentive to local residents to use the tram. Additional parking capacity is urgently needed to avoid the current problems which can also result in overspill random parking in and around the tram corridor.

Choice 7 – Supporting the reduction in car use in Edinburgh.

(a) Mobility Challenges

As stated above the key to achieving a reduction in car use in Edinburgh is the provision of effective and efficient public transport. Walking and cycling are not an option for most people who live in and around Edinburgh.

(b) Parking controls

It should be borne in mind that parking restrictions in the centre of the city tend to create parking congestion in the commuter areas.

(c) Electric Vehicles

The Community Council agrees that a need exists for electric car charging infrastructure throughout Edinburgh.

Choice 8 – Delivering new walking and cycling routes

(a) Cycle and Footpath Network

Ratho & District Community Council supports the development of strategic walking and cycling routes across the city. Reference to the A71 as a potential cycling super highway, however, raises concerns for our Community Council as cyclists currently cause problems at peak travel hours due to the limited passing opportunities. It should be borne in mind in the development of such new infrastructure (evidenced by the increased traffic on the Union Canal Towpath) that the sharing of routes by cyclists and walkers can cause disharmony and safety challenges and that the needs of children and the mobility disadvantaged also need to be carefully addressed. Some of the existing routes require urgent attention to address these safety issues.

Choice 11 - Delivering more affordable homes

Ratho & District Community Council supports the proposal to amend the policy requiring developers to increase the provision of affordable housing requirement from 25% to 35% provided such a move does not result in increased cost pressures on market housing in Edinburgh.

Choice 12 – Building our new homes and infrastructure

(a) Sustainable Delivery

Ratho & District Community Council supports the Council's preferred 'Option 1- Delivery by the Council and its partners within the Urban Area' with the use of CPO as and when required. In determining suitable sites it is important that all infrastructure requirements associated with each site are identified and critical requirements delivered before commencement of house construction. The Community Council is also of the view that the use of green belt land should be avoided at all costs and should only be considered in exceptional circumstances.

(b) Area 5 - Calderwood

Ratho & District Community Council notes the proposal to develop this site adjacent to current development at West Lothian and prefers this proposal to 'new village' type developments in our area. It should be borne in mind however that this site lacks direct public transport options and the current active travel arrangements along the A71 are inadequate and considered unsafe.

Choice 14 – Delivering West Edinburgh

Ratho & District Community Council recognises the significance of the area in transport and economic development terms. The successful tram services, the Gateway rail interchange and other good public transport facilities already provide good linkage to Edinburgh Airport and Royal Highland Centre and they clearly provide an opportunity for further growth in the local area. Ratho & District Community Council is supportive of the proposed new eastern road access arrangements to Edinburgh Airport and of the intention to maximise business growth opportunities at the International Business Gateway and at Crosswinds. The Community Council are also keen to see progress with planned housing developments at Ratho Station and at the former Continental Tyre Factory at Old Liston Road, Newbridge.

Ratho & District Community Council hopes that the above brief comments are helpful at this stage of the LDP Review and will be happy to provide clarification or further comment on any of the above matters if required.

Regards,

Graham Low Vice Chair, Ratho & District Community Council
