Choice	1 A								
	•		es together as part of a city-wic support / don't support	ide, regional, and national green network. We want new development to connect to	o, and				
Short Response	e Yes								
Explanation	Important that a sustainable transport network is delivered both to and from the city centre. The majority of traffic generation is created at peak times and in concentrated parts of the city. At present, alternative and sustainable means of transport are limited by a lack of green infrastructure. Working within the city and with their adjacent Councils to provide this is exceedingly important if the Council wishes to hit its ambitious carbon targets.								
Choice	1 B								
We want to chan	ge our policy t	o require all developm	ent (including change of use) to	to include green and blue infrastructure. Do you agree with this? - Support / Object					
Short Response	Yes								
Explanation	It is important however that any statutory requirements are proportionate and economically viable in the context of the development being proposed. There should be flexibility in how this is implemented on a development by development basis.
