

Culture Service Efficiencies statement

In 2021/22 it is intended to make a small number of internal service efficiencies to achieve the saving required. It is anticipated that these will be achieved by reducing operational costs (e.g. for materials and supplies and services). It is not anticipated that these changes will impact on the public visiting Museums and Galleries and there are no positive or negative impacts identified for people with protected characteristics, people vulnerable of falling into poverty, geographical communities or Council staff.

On the longer term saving, a full IIA will be completed at the appropriate time.

Paul Lawrence
