

PIPE STREET – RSO/22/02

STATEMENT OF REASONS

A wall separating Pipe St and Pipe Lane has been removed to improve access from Portobello High St to the Promenade as part of broader active travel improvements in the area. This has allowed the creation of a modal filter on the site of the former wall. The middle of this section is shared use for pedestrians and cyclists. An RSO is required to designate this middle area cycle lane leaving the area to the north and south as pavement.
