

TRO/24/31 Statement of Reasons:

A number of amendments have been identified as being required to ensure the effective and efficient working of the new zones implemented as part of the Strategic Review of Parking. These amendments take account of situations identified during the course of the implementation process and will help to ensure that restrictions work effectively across the new zones.

The proposed changes in Rossie Place will address concerns that certain parked vehicles are impacting upon the ability of other road users to safely use this road.

The proposals for Drum Terrace, which will see Drum Terrace added to zone N7, recognise that this street can only be accessed from N7 and will help to ensure that residents of this street are able to access nearby parking places.
