

RSO/21/09 Statement of Reasons

As part of the capital maintenance scheme along Telford Road, it is proposed to replace the existing traffic signal junction at the junction of Telford Road/Groathill Avenue. New footway buildouts at the corners of Groathill Avenue will improve pedestrian movements and decrease pedestrian crossing widths across Telford Road. It is also proposed to replace the existing signal crossing west of the access to the Western General Hospital and replace two of the existing refuge islands with larger islands. These proposed changes will result in improved pedestrian movements and enhanced pedestrian safety

These changes are all in line with and follow the Council's commitment and vision to improving pedestrian movements, giving priority to pedestrians, and creating a safer built environment.
